Ask Yourself...

- ❓ How much paper, ink, and time do I waste by printing documents without previewing them first?
- ❓ Do I have numerous pre-printed forms that I run out of and are costly to store?
- ❓ Do my customers feel that my office is unprofessional because we use an old, noisy, slow printer?
- ❓ Do I manually scan and catalog documents increasing my risk of losing documents?

The average worker uses \$700 worth of paper every year. 1/2 of all documents printed are thrown away within 24 hours.¹

Expect Results

- Save money by reducing costly misprints.
- Decrease the costs associated with ordering and storing preprinted forms.
- Decrease the time required in F&I to find, line up, and print on preprinted form stocks.
- Save time by integrating with your Image-Based Document Retrieval and Internet Document Imaging systems so you no longer have to manually scan and catalog documents.
